Azure Automation Capabilities

Runbook Authoring in Azure:

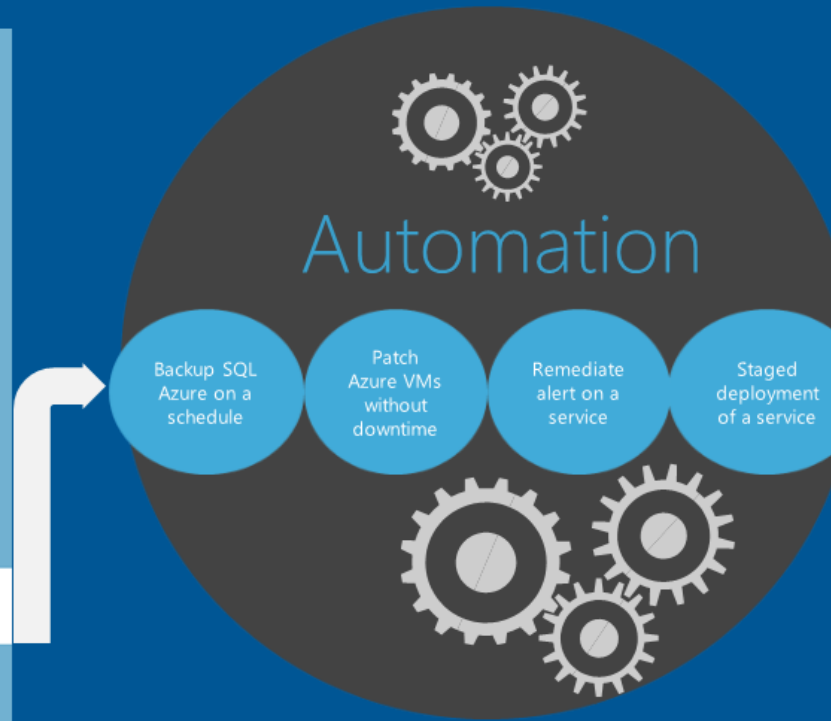

Create runbooks to automate all aspects of cloud operations, from deployment, monitoring, and optimizations

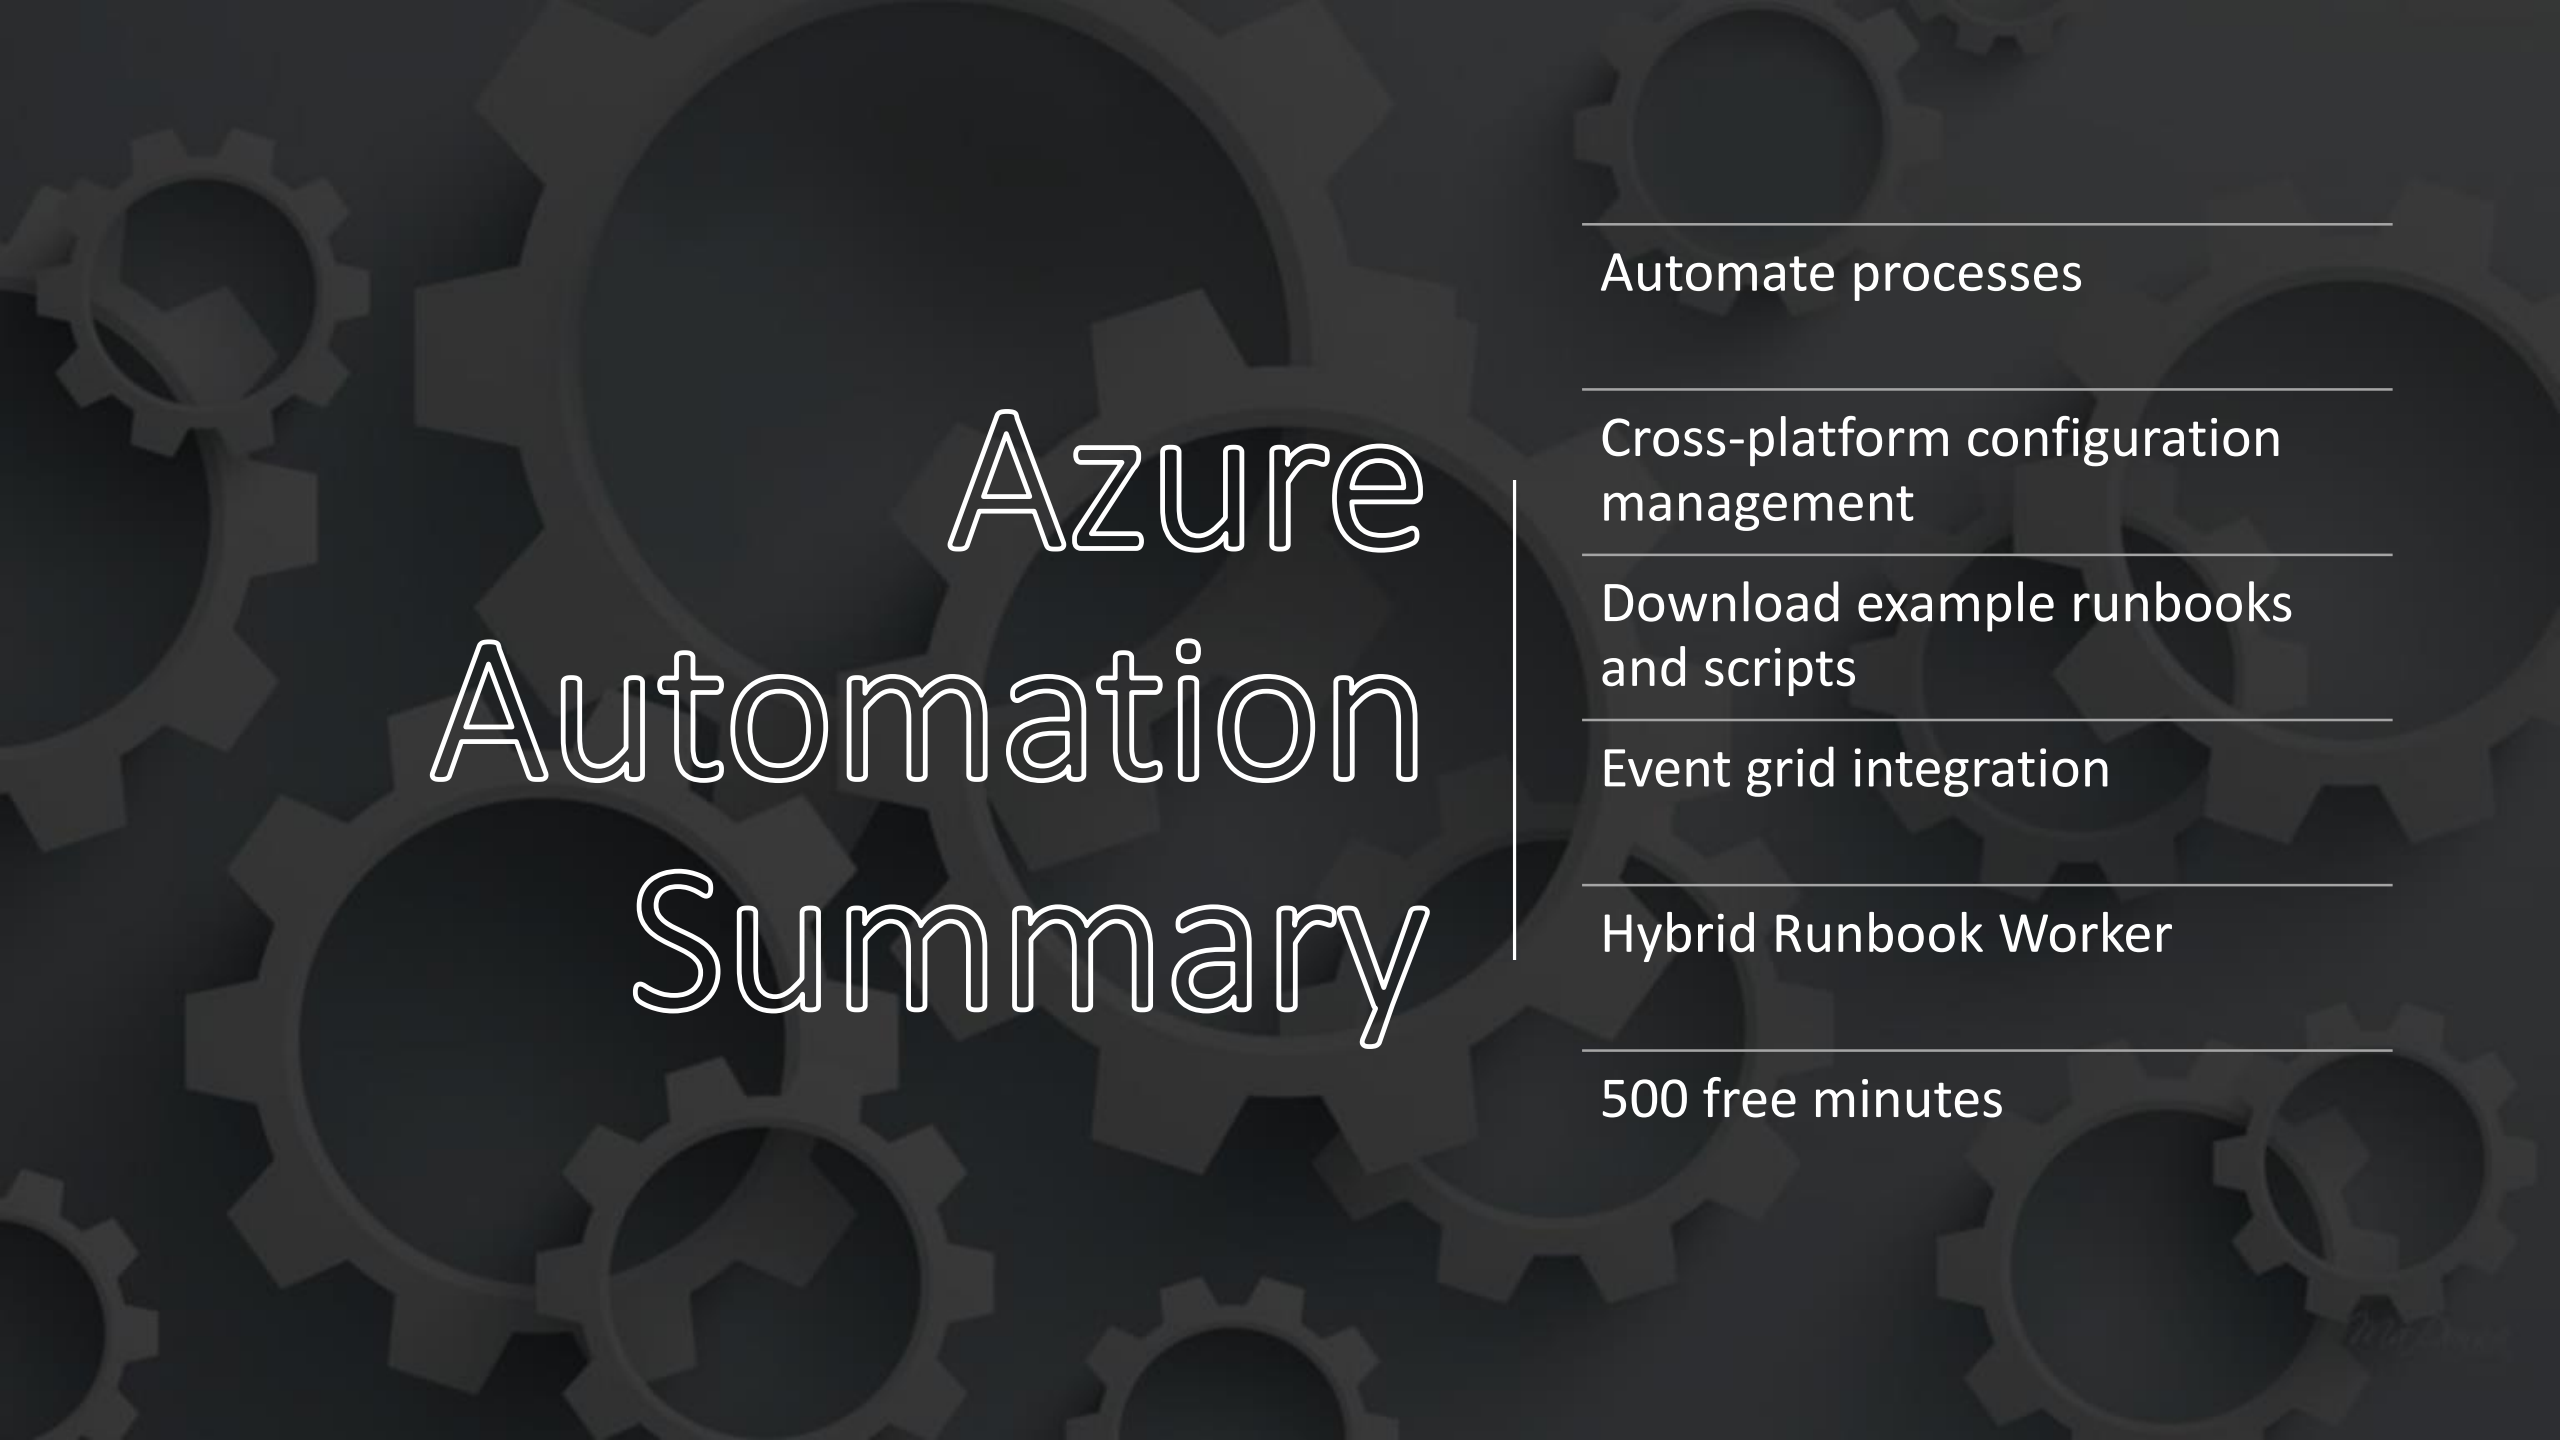

Highly Available Engine:

Support requirements for scale and H/A. Built on PowerShell Workflow. Isolation for runbook jobs

Integration into other systems:

Import PS modules and create additional modules and runbooks for Azure services or to connect into 3rd party systems

Azure Automation Summary

Automate processes

Cross-platform configuration
management

Download example runbooks
and scripts

Event grid integration

Azure Functions

What is
serverless?

Azure Web Apps

Advantages of Azure Functions

Pay for what you use

No Infrastructure to manage

No maintenance of servers

Can be placed in existing subscriptions

Simplify code writing

What are we trying to solve?

Re-using existing skills

Re-using existing code / scripts

Faster deployment

Less maintenance

Demo 1

Exploring Azure Functions

Demo Summary

- Triggers available
- Experimental flag
- How to create Azure Function
- Delete Azure Function

15 Septembre 2018 - #FrPwshSat2018

Experimental Language Support: ☒ Enabled

PowerShell language support is still experimental

Demo 2

Create timed function

Demo Summary

- Create PowerShell function
- Used cron notation

15 Septembre 2018 - #FrPwshSat2018

Demo 3

Azure PowerShell Function

Demo Summary

- Which PowerShell version
- What variables are defined
- Saw the variables & files
- Reconfigured function.json
- Used Invoke-RestMethod to run

Demo 4

Azure Function Errors

Demo Summary

- Had our function fail
- Looked at different error logs
- Fixed the code based on output
